# What Parents & Educators Need to Know about WHATSAPP

With more than two billion active users, WhatsApp is the world's most popular messaging service. Its end-to-end encryption only allows messages to be viewed by the sender and any recipients: not even WhatsApp itself can read them. The UK's Online Safety Bill proposes to end such encryption on private messaging, but for the time being, this controversial feature remains.

## ...MSG ME...

### WHAT ARE THE RISKS?

### EVOLVING SCAMS

WhatsApp's popularity makes it a lucrative hunting ground for scammers. Recent examples include posing as the target's child, requesting a money transfer because of a spurious 'emergency' – plus a scam where fraudsters trigger a verification message by attempting to log in to your account, then (posing as WhatsApp) call or text to ask you to repeat the code back to them, giving them access.

### CONTACT FROM STRANGERS

To start a chat, someone only needs the mobile number of the WhatsApp user that they want to message. Therefore, if a child has ever given their number out to someone they don't know, that person could then contact them via WhatsApp. It's also possible that the child might be added to a group chat or community (by one of their friends, for example) containing other people that they don't know.

### CHAT LOCK

In 2023, WhatsApp introduced a feature that lets users keep their chats in a separate 'locked chats' folder, saved behind their phone's passcode, fingerprint or face ID authentication. They subsequently developed an additional feature – 'Secret Code' – where users set a unique password for their locked chats. Unfortunately, this function creates the potential for young people to hide conversations and content they suspect their parents wouldn't approve of (such as age-inappropriate material).

### COMMUNITIES AND GROUPS

A community is a collection of related groups on WhatsApp. They can consist of thousands of users. Communities can often be used by scammers to target large groups, hoping someone clicks on their link or responds to their requests. In communities and groups, there are multiple ongoing conversations, which results in pressure to respond. Members – even if they are not each other's contacts – will be able to see any messages sent into the group.

### VISIBLE LOCATION

WhatsApp's 'live location' feature lets users share their current whereabouts, which can be helpful for friends meeting up or parents checking that their child is safe while out, for example. However, anyone in a user's contacts list or in a mutual group chat can also track their location – potentially letting strangers identify a child's home address or journeys that they make regularly.

### FAKE NEWS

WhatsApp's connectivity and ease of use allows news to be shared rapidly – whether it's true or not. To combat the spread of misinformation, messages forwarded more than five times on the app now display a "Forwarded many times" label and a double arrow icon. This makes users aware that the message they've just received is far from an original – and might not be entirely factual, either.

### 'VIEW ONCE' CONTENT

The ability to send images or messages that can only be viewed once has led to some WhatsApp users sharing inappropriate material or abusive texts, knowing that the recipient can't re-open them later to use as evidence of misconduct. People used to be able to screenshot this disappearing content – but a recently added WhatsApp feature now blocks this, citing protection of privacy.

## Advice for Parents & Educators

### EMPHASISE CAUTION

Encourage children to treat unexpected messages with caution: get them to consider whether it sounds like something a friend or relative

### ADJUST THE SETTINGS

It's wise to change a child's WhatsApp settings to specify which of their contacts can add them to group chats without needing

### DISCUSS GROUP CHATS

Make children aware that there could be members of a group that they don't know well and that words can be misinterpreted. Encourage
